

THERMAL BARCODE PRINTING SOLUTIONS FOR MANUFACTURING

James Imaging Systems thermal barcode printers are the perfect solution for business-critical labeling applications. Thermal barcode printing solutions that offer durability, fast print speed, long life span and unparalleled reliability. A cost-effective printing solution with superior print quality designed to perform in the toughest industrial environments. The user-friendly design allows for easy setup, use, maintenance and troubleshooting.

INDUSTRIAL STRENGTH. EXCEPTIONAL PERFORMANCE.

Industrial strength printing solutions for demanding environments that are built to meet your productivity needs from the manufacturing floor to the front office. Designed for operations where high-volume throughput of labels must be produced quickly or in a 24/7 setting, industrial barcode printers feature a rugged design that enables them to withstand temperature extremes, exposure to liquids, dust, and chemicals, and drops to concrete. Thermal barcode printing solutions to meet your industrial needs.

PRODUCTION FLOOR EFFICIENCY

Today's production floor is complex and requires real-time visibility to track-trace and optimize every process, asset and resource with extreme accuracy. James Imaging Systems thermal printing solutions allow you to control your agile manufacturing production environment to consistently produce product on cost, on time, and on spec. Production floor essential functionality includes:

- Traceability
- Quality Assurance
- Asset and Facility Management
- Work in Process
- Compliance Labeling
- Parts Management
- Equipment Maintenance
- Network Connectivity

SMART WAREHOUSE ENABLEMENT

To effectively manage a warehouse, a distribution center, or inventory in your backroom, it is important to be well-connected and have visibility into all your assets, people, and processes. Integrate your supply chain, improve productivity, and increase profitability with thermal printing solutions from James Imaging Systems. Warehouse operational efficiencies include:

- Receiving
- Put-away & Replenishment
- Inventory & Materials Management
- Multi-Modal & Voice-Directed Picking
- Packing & Staging
- Cross Docking
- Shipping
- Reverse Logistics
- Cold Chain Management

AUTHORIZED ZEBRA RESELLER & SERVICE PROVIDER

As an authorized Zebra channel service provider, we can help you increase uptime and operational efficiencies. Our Zebra trained and certified repair specialists provide on-site repair services and our parts inventory means less downtime for your operation. With same day or next day response, James Imaging is the preferred provider for Zebra printer repair and technical support services. We can also assist with evaluating the cost-effectiveness of repairing a printer versus replacing a printer.
